DRAGON FACTS

AERIAL RECLUSE

#150

HABITAT: Crimson, Golden, & Amethyst Caves

SIZE: Large

COST:   

NEST:  

TRAIT: **HELPFUL**

The Aerial Recluse spends most of its time at an altitude of 9,000 to 12,000 meters (approximately 30,000 to 40,000 feet). Although it typically stays well away from humans, its mating season frequently disrupts air travel.

ALGAL LINDWORM

#3

HABITAT: Golden & Amethyst Caves

SIZE: Hatchling

COST:    

TRAIT: **HELPFUL**

The Algal Lindworm lives in lakes and subsists off algae for most of its life. It only turns carnivorous during its brief mating season, eating fish, aquatic birds, and even the odd manatee.

AGED SEA SERPENT

#40

HABITAT: Golden Cave

SIZE: Small

COST:   

NEST: 

TRAIT: **HELPFUL**

Fossils that look virtually identical in morphology to the Aged Sea Serpent have been found dating back over 200 million years.

ALOOF GRYPHDRAGON

#51

HABITAT: Crimson, Golden, & Amethyst Caves

SIZE: Small

COST: 

NEST:   

TRAIT: **SHY**

The Aloof Gryphdragon can be summoned with an onyx amulet, but finds the practice to be extremely offensive.

ANCIENT ONE

#67

HABITAT: Golden Cave

SIZE: Medium

COST:   

NEST:  

TRAIT: **SHY**

Since the beginning of reliable recordkeeping, circa 1850, there have been no known instances of an Ancient One dying of natural causes or even showing signs of degenerative aging.
